DETAILED ACTION

Response to Amendments

Applicant's amendments filed on 6/2/2008 has been carefully considered. As a result of cancelling claim 7 and amending claims 1 and 10, the application is now in condition for allowance.

Specification

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Allowable Subject Matter

Claims 1-6 and 8-21 are allowable.

The following is an examiner's statement of reasons for allowance: Claim 1 is allowed over the prior art made of record. The prior art of record, considered individually or in combination fails to fairly teach or suggest claimed converter comprising, among other limitations, a novel and unobvious limitation of "the quantizing device has at least one first, second and third comparator each having a first and a second input and an output, the filtered signal being applied to the first input, the outputs each supplying a comparison result and a first, second and third reference potential being switched to the second input, the second reference potential lying between the first and third reference potentials and being closest to the potential of the

filtered signal" structurally and functionally interconnected with other limitations in the manner as cited in the claim and dependent claims 2-6 and 8-9.

Claim 10 is allowed over the prior art made of record. The prior art of record, considered individually or in combination fails to fairly teach or suggest claimed converter comprising, among other limitations, a novel and unobvious limitation of "the quantizing device has at least one first, second and third comparator each having a first and a second input and an output, the filtered signal being applied to the first input, the outputs each supplying a comparison result and a first, second and third reference potential being switched to the second input, the second reference potential lying between the first and third reference potentials and being closest to the potential of the filtered signal" structurally and functionally interconnected with other limitations in the manner as cited in the claim and dependent claims 11-21.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Cited References

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references are related to instant application subject matter.
